

FAKULTA MANAGEMENTU A EKONOMIKY
Univerzita Tomáše Bati ve Zlíně

Posudek vedoucí diplomové práce

Jméno studenta:
David Mikala

Vedoucí DP:
doc. Ing. Petr Briš, CSc.

Ak. rok:
2009/2010

Téma DP:

Project on purchasing process optimisation according to standard ČSN ISO/TS 16949:2002 in
HONEYWELL spol. s r.o.

Kritéria hodnocení:		Stupeň hodnocení podle ECTS					
		A 1	B 1,5	C 2	D 2,5	E 3	F 5
1	Náročnosti tématu práce		x				
2	Splnění cílů práce	X					
3	Teoretické části práce	x					
4	Praktické části práce (analytická část)		x				
5	Praktické části práce (řešící část)	X					
6	Fornální úrovně práce		x				

Hodnocení v jednotlivých kritériích označte znakem X) v příslušné úrovni.

(Obraťte, prosím, list a pokračujte v hodnocení na druhé straně formuláře.)

Celkové hodnocení práce a otázky k obhajobě:

(otázky uvádí vedoucí práce i oponent)

Project content intensity classification

Candidate choses as a content of his project a quality management in Honeywell spol.s.r.o. (Corp.) with a goal to propose a purchasing system as of ISO/TS 16949:2002. This project is in accord with his field of study, intensity of problems solved is based on detailed research on manufacturing and management processes within Honeywell spol.s.r.o.

Project objective was achieved in principle. New way of purchasing system was proposed and executed, using E-auction tool.

Theoretical part classification

Theoretical part defines basic terms in fields of quality and purchasing. Foreign literature is used broadly. This part is dealing with specific requirements of quality management and related fields, as of ISO/TS 16949 and ISO 9000 international standards. As a whole, it can serve as a good base for a project solution, expert literature resources are satisfactory.

Practical part classification (analytical part)

Analytical part is describing a current quality management system, stressing purchasing part and pointing out possibilities of its improvement.

Practical part classification (solution part)

Critical evaluation of the analytical part facilitated to propose new solutions by candidate. Such proposals are later successfully put into effect and documented. Practical part is than logically linked with a theoretical one. Changes proposed are not economically fully evaluated. Missing is a comparison of existing purchasing system with E-auction.

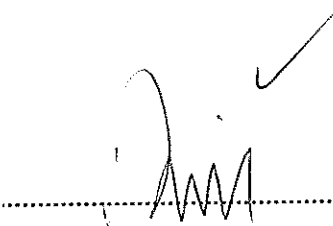

Overall formal and grammatical level of this project matches the requirement of a university graduate. There is a shortage of valuation mentioned, inaccurate quotations, inferior readability of some parts (for example Fig.7), and missing some shortcuts explanation as well. Highly regarded is a list of literature and use of foreign resources.

Questions:

1. Try to asses the economical impact after the implementation of measures recommended by you.
2. Do you think that newly proposed purchasing management system will not influence your products quality?

Návrh na klasifikaci diplomové práce: B - velmi dobře
