

SUPERVISOR RECOMMENDATION

ING. MIROSLAV MRLIK

Miroslav Mrlik is a full-time student in the Ph.D. programme "Technology of Macromolecular Compounds" at the Faculty of Technology in Zlin, Czech Republic since September 2009.

Miroslav is involved in development of new materials suitable for preparation of novel electrorheological fluids based on core-shell structured particles and magnetorheological suspensions with improved oxidation and sedimentation stability.

He already published his results in original papers in scientific journals and also presented his results on conferences. He was involved in research supported by Czech Science Foundation and also by internal student projects of Tomas Bata University in Zlin.

Beside research activity related to his Ph.D. Thesis he also co-operates with Slovak Academy of Sciences on projects which he joined during his study stay in Slovakia.

Miroslav is a smart, hardworking personality with experience in scientific work. Recently he took 3rd place in Jean-Marie Lehn Award 2013.
