<b>INTRODUCTION .....</b>	<b>7</b>
<b>1 SYSTEM DEFINITION .....</b>	<b>10</b>
1.1 A KNOWLEDGE BASE REASONING (KBR).....	10
<b>2 AUTOMATION OBJECTIVES .....</b>	<b>12</b>
2.1 DEVELOPING GOALS FOR AUTOMATON .....	12
2.2 DEVELOPING MEASURABLE OBJECTIVES.....	12
2.3 QUANTIFYING COSTS AND BENEFITS .....	15
2.4 IT AUTOMATION .....	17
2.4.1 Example: Cloud computing and security: An automation scenario.....	17
2.5 CIM/CAM CONCEPTION .....	18
2.5.1 CIM: Computer Integrated Manufacturing .....	18
2.6 CAM (COMPUTER AIDED MANUFACTURING) .....	21
2.6.1 Greater Precision .....	22
2.6.2 Automation and Use of Robotics .....	22
2.6.3 What Are the Different Types of Compute Aided Manufacturing.....	22
<b>3 APPLIED INFORMATICS AND AUTOMATION IN INDUSTRY .....</b>	<b>23</b>
<b>4 BUILDING STEPS FOR CIM SYSTEMS.....</b>	<b>24</b>
4.1 BEGINNING THE PRODUCT CYCLE .....	25
4.2 COMPUTER AIDED DESIGN .....	25
4.3 MECHANICAL CAD SYSTEMS.....	25
4.4 ELECTRICAL/ELECTRONICS CAD SYSTEMS .....	26
4.5 ARCHITECTURE, ENGINEERING AND CONSTRUCTION CAD SYSTEMS .....	26
4.6 TECHNICAL PUBLICATIONS .....	26
4.7 COMPUTER-AIDED ENGINEERING .....	27
4.8 COMPUTER-AIDED PROCESS PLANNING .....	27
4.9 MANUFACTURING THE PRODUCT .....	27
<b>5 OBJECT-PROCESS ANALYSIS OF COMPUTER INTEGRATED MANUFACTURING DOCUMENTATION AND INSPECTION FUNCTIONS.....</b>	<b>29</b>
<b>6 ELABORATION OF SYSTEM STRUCTURE, FUNCTIONAL, TECHNICAL AND PROGRAM RESOURCES, DATA AND INFORMATION, OPERATIONAL .....</b>	<b>34</b>
6.1 FUNCTIONAL REQUIREMENTS.....	34
6.2 EXAMPLES OF FUNCTIONAL REQUIREMENTS.....	34
6.3 ALTERNATIVE DOCUMENT NAMES AND ACRONYMS.....	35
6.4 VALIDATION DOCUMENT RESOURCES.....	35
<b>7 COMPUTER SUPPORT PROJECTING PROJECTS TYPE STANDARDS AND LEGAL MEASURES DRAWINGS TYPE AND DRAWING NUMBERING .....</b>	<b>37</b>
7.1 DRAWING VERIFICATION AND APPROVAL .....	37
7.2 DATING DRAWINGS .....	37
7.3 REFERENCE IDENTIFIERS.....	37

7.4 GENERAL RULES .....	38
7.5 NUMBERING, CODING AND IDENTIFICATION.....	38
7.5.1 Drawing Numbers.....	38
7.5.2 Drawing Number Length.....	38
7.5.3 Computer Support for Successful Project Management: Using MS Project 16 with Construction.....	39
<b>8 ELECTRICAL INFLUENCES, EXTERNAL ENVIRONMENT, INTERNAL, ELECTROMAGNETIC COMPABILITY, MARKING OF MEASURING AND REGULATION CIRCUITS, STATIC AND DYNAMIC PROPERTIES OF DEVICES AND CIRCUITS.....</b>	<b>40</b>
8.1 ELECTROMAGNETIC COMPABILITY (EMC).....	40
8.2 ELECTROMAGNETIC INTERFERENCE CONTROL.....	41
8.3 NUCLEAR ELECTROMAGNETIC PULSE.....	41
8.4 LIST OF COMMON EMC TEST STANDARDS .....	42
8.4.1 CISPR standards.....	42
8.4.2 IEC standards.....	43
8.4.3 ISO standards .....	44
8.4.4 European standards concerning unwanted electrical emissions .....	45
8.4.5 European standards concerning immunity to electrical emissions .....	45
8.4.6 American standards.....	46
8.4.7 EMC aware programming.....	46
8.4.8 Motivation.....	47
8.4.9 Emission Sources.....	47
8.4.10 The Oscillator.....	48
8.4.11 The Power Supply.....	48
8.4.12 The I/O Pins .....	48
8.4.13 Ringing .....	48
8.4.14 Ground Bounce Rise and Fall Time.....	49
8.4.15 Emission Control: Power Saving.....	49
8.4.16 Conclusion .....	49
8.5 COMPUTATIONAL ELECTROMAGNETICS .....	49
8.5.1 Background .....	50
8.5.2 Overview of methods.....	50
8.5.3 Choice of methods .....	51
8.5.4 Maxwell's equations in hyperbolic PDE form.....	51
8.5.5 Integral equation solvers Partial.....	51
8.5.6 Method of moments element method .....	51
8.5.7 Fast multipole method .....	52
8.5.8 Plane wave time domain.....	52
8.5.9 Partial element equivalent circuit method .....	52
8.5.10 Finite difference time domain.....	53
8.5.11 Multiresolution time domain.....	54
8.5.12 Finite element method .....	54
8.5.13 Finite integration technique .....	54
8.5.14 Pseudospectral time domain .....	55
8.5.15 Pseudo-spectral spatial domain.....	55
8.5.16 Transmission line matrix .....	55
8.5.17 Locally one-dimensional.....	55
8.5.18 EigenMode Expansion.....	55

8.5.19	<i>Physical optics</i>	56
8.5.20	<i>Uniform theory of diffraction</i>	56
8.5.21	<i>Validation</i>	56
8.5.22	<i>Comparison between simulation results and analytical formulation</i>	56
<b>9</b>	<b>DESIGNING OF MEASURING CIRCUITS, DATA PROCESSING UNITS FOR DATA AND FIGURE, CENTRAL UNITS, CONTROL UNITS</b>	<b>57</b>
9.1	SETUP FOR MEASURING POWER-PLANE-IMPEDANCES	57
9.2	DATA PREPARATION AND PROCESSING	58
9.3	CONTROL UNIT (CU)	60
9.4	DATA CENTERS	60
<b>10</b>	<b>DESIGN OF POWER CONTROL DEVICES: RELAY, CONTACTOR, ACTUATOR, SOFT STARTER, FREQUENCY INVERTER AND FLUID CONTROL IN PIPING: VALVES, COCKS, FLAPS, SERVO-DRIVES</b>	<b>61</b>
<b>11</b>	<b>OPERATION OF INTEGRATED AUTOMATION SYSTEMS; MAINTENANCE OF TECHNICAL MEANS; SERVICING AND UPGRADE OF PROGRAM RESOURCES; DIAGNOSTICS; VERIFICATION OF SPECIFIED GAUGES</b>	<b>63</b>
11.1	TOTALLY INTEGRATED AUTOMATION IN THE DIGITAL ENTERPRISE	63
11.1.1	<i>Driving the Digital Enterprise with Totally Integrated Automation</i>	63
11.1.2	<i>Maintenance</i>	64
11.2	UPDATE PROGRAM RESOURCES	64
11.3	DIAGNOSTICS	65
11.4	VERIFICATION	66
11.5	OVERVIEW OF THE DIFFERENCES BETWEEN VERIFICATION AND CALIBRATION	66
<b>12</b>	<b>CPS DESIGN CHALLENGES</b>	<b>67</b>
12.1	REQUIREMENTS FOR CPS	67
12.2	BACKGROUND	71
12.3	SOLUTIONS	74
<b>13</b>	<b>NEED FOR CPS RESEARCH</b>	<b>77</b>
13.1	ABSTRACTION AND ARCHITECTURES	77
13.2	DISTRIBUTED COMPUTATIONS AND NETWORKED CONTROL	77
13.3	VERIFICATION AND VALIDATION	78
13.4	CHALLENGES AND OPPORTUNITIES: INDUSTRY-ACADEMIA	78
13.5	BIOMEDICAL AND HEALTHCARE SYSTEMS	79
13.6	NEXT-GENERATION AIR TRANSPORTATION SYSTEMS (NEXTGEN)	80
13.7	SMART GRID AND RENEWABLE ENERGY	80
<b>14</b>	<b>DESIGN PROCESS OF CPS</b>	<b>82</b>
<b>15</b>	<b>CYBER-PHYSICAL SYSTEMS (CPS)-APPLICATIONS</b>	<b>84</b>
15.1	APPLICATION	84
15.1.1	<i>Cooling Data Center</i>	84
15.2	CAR-TO-CAR COMMUNICATIONS	85
15.3	HEALTHCARE	85
15.4	POWER GRID/SMART GRID	85
15.5	A NEW RESEARCH AREA	85
15.6	RESEARCH CHALLENGES	86
15.6.1	<i>Sensor node model</i>	86

15.6.2	<i>What are Wireless Sensor Networks (WSNs)?</i> .....	87
15.6.3	<i>What is Wireless Sensor Networks (WSN)?</i> .....	87
15.6.4	<i>WSN in building environment</i> .....	87
15.6.5	<i>Forest observation, fire detection</i> .....	87
15.6.6	<i>Military Operation: Shooter localization [9]</i> .....	87
15.6.7	<i>Urban Sensing [11]</i> .....	88
15.6.8	<i>Oceanic Environment</i> .....	88
15.6.9	<i>Wildlife behavior analysis and interaction modeling</i> .....	89
15.6.10	<i>Body Sensor Networks [12]</i> .....	90
15.6.11	<i>Lifetime in WSN</i> .....	90
15.6.12	<i>Research Topics</i> .....	90
<b>16</b>	<b>MOBILE SOCIAL NETWORKS (MSN)</b> .....	<b>94</b>
<b>17</b>	<b>RFID SYSTEMS; INTERNET OF THINGS</b> .....	<b>94</b>
<b>18</b>	<b>SECURING CYBER-PHYSICAL SYSTEMS [13, 14]</b> .....	<b>96</b>
<b>19</b>	<b>CASE STUDY – HARDWARE AND SOFTWARE PROJECT [15]</b> .....	<b>104</b>
19.1	<i>BUILDING A HEALTHY AND RESILIENT CYBER ECOSYSTEM WITH AUTOMATED COLLECTIVE ACTION, ENABLING DISTRIBUTED IN CYBERSPACE</i> .....	104
19.2	<i>TIME FOR CPS DES &amp; DEPLOYMENT</i> .....	104
19.3	<i>CPS SECURITY PROJECT PURPOSE</i> .....	105
19.4	<i>BACKGROUND AND PURPOSE</i> .....	107
19.5	<i>THE CASE FOR MORE SECURE CYBER ECOSYSTEM</i> .....	107
19.6	<i>BUILDING BLOCKS FOR A HEALTHY CYBER ECOSYSTEM</i> .....	110
19.6.1	<i>Building Block 1: Automation [20]</i> .....	110
19.6.2	<i>Building Block 2: Interoperability</i> .....	113
19.6.3	<i>Building Block 3: Authentication [26]</i> .....	119
19.7	<i>KEY CONCEPTS</i> .....	120
19.7.1	<i>Focus and Convergence Maturity Model for Networked Environments</i> .....	121
19.7.2	<i>Attributes of a Healthy Cyber Ecosystem [29]</i> .....	124
19.7.3	<i>Attributes of Healthy Participants</i> .....	125
19.7.4	<i>Incentives and Adoption</i> .....	128
19.7.5	<i>Way Ahead</i> .....	129
19.8	<i>General Terms</i> .....	129
19.9	<i>Standards Acronymus</i> .....	130
<b>20</b>	<b>TOWARDS THE CENTURY OF SMART CITIES [30]</b> .....	<b>131</b>
20.1	<i>URBAN CHALLENGES</i> .....	131
20.2	<i>CITY COMPETITION</i> .....	132
20.2.1	<i>General Terms</i> .....	132
20.2.2	<i>Resilience and cyber resilience</i> .....	133
20.3	<i>THE INTEGRATED AND INTERRELATED SMART CITY AND ITS KEY</i> .....	133
20.3.1	<i>Functional areas</i> .....	133
20.4	<i>PUBLIC SAFETY AND SECURITY</i> .....	135
20.5	<i>WIRELESS COMMUNICATIONS AND HOT SPOTS</i> .....	136
20.6	<i>ENSURING CONTINUITY OF CRITICAL SERVICES</i> .....	137
20.7	<i>WIRELESS COMMUNICATIONS AND HOT SPOTS</i> .....	139
20.7.1	<i>Resilience and cyber residence</i> .....	139

20.7.2	<i>Optimising intelligent transportation</i>	140
20.7.3	<i>Protecting connected healthcare</i>	141
20.7.4	<i>Maintaining public safety and security</i>	141
20.7.5	<i>Securing wireless communications and hotspots</i>	141
20.7.6	<i>Safeguarding the connected smart city</i>	141
20.7.7	<i>Recommendations for a secure transition to a resident smart city</i>	142
20.7.8	<i>Protecting informatik proactively</i>	144
20.7.9	<i>Authenticating users</i>	144
20.7.10	<i>Leveraging threat intelligence</i>	144
20.7.11	<i>Symantec Global Intelligence Network</i>	144
20.7.12	<i>Balancing traditional versus cloud delivery</i>	145
20.7.13	<i>Managing security services</i>	145
20.7.14	<i>Protecting the infrastructure</i>	145
20.7.15	<i>24x7 availability of the critical infrastructure</i>	145
20.7.16	<i>Developing an information management strategy</i>	145
20.7.17	<i>Cooperating with a security and information protection partner</i>	146
<b>21</b>	<b>PROJECT</b>	<b>146</b>
21.1	FAULT TOLERANT CPS USING FORMAL METHOD EVENT-B [36, 37, 38]	146
21.1.1	<i>Event-B &amp; Rodin [34, 35]</i>	146
21.2	FAULT-TOLERANCE IN CPS	150
21.3	FAULT-TOLERANCE IN A COMPONENT INTERACTION	150
21.4	FAULT-TOLERANCE PATTERNS FOR EVENT-B MODELS OF CPS	151
21.5	APPLYING THE PATTERNS	152
21.6	INITIAL DEVELOPMENT CHAIN	154
<b>22</b>	<b>CONCLUSION</b>	<b>161</b>
<b>23</b>	<b>REFERENCES</b>	<b>162</b>
