Overall thesis assessment and questions for the defence:
(Both the Master's thesis supervisor and reviewer present their questions.)

This Master's thesis deals with an interesting issue, i.e. with analysing cash flow effects on corporate performance of insurance company. Firstly, the Master's student conducts a literature review of foreign literature sources relevant to the analysed field. The practical part is directly oriented on analysis of cash flow in the analysed company and concludes with proposals for improving cashflow performance. I therefore miss a project, in particular applying the new found theory into investigating impact of cashflow effect on corporate performance, the set objective in the Assignment. The Master's student could also used bibliography from his Master's thesis assignment. To the formal layout, formulas could have been numbered and page numbers are missing from page 52.

Questions:

- 1) What do you, please, mean by " the new found theory" on the p.2?
- 2) According to Table 10, can you, please, discuss it in more detail?

The thesis meets the criteria for the defence of the MT¹.
