7. Theoretical part elaboration quality	☒	☐	☐	☐	☐	☐
8. Practical part elaboration quality	☒	☐	☐	☐	☐	☐
9. Achieved results of the work	☒	☐	☐	☐	☐	☐
10. Contribution of the thesis and its exploitation	☒	☐	☐	☐	☐	☐
11. Cooperation of thesis author with the supervisor	☐	☒	☐	☐	☐	☐

Result of the plagiarism test:
The work was assessed in terms of plagiarism with the result 7 % identity. The work is not plagiarism, it deals with some general phrases.

Overall evaluation of the thesis:
The resulting mark is not the average of all of the abovementioned evaluations. The mark is awarded by the thesis supervisor according to their deliberations and the ECTS classification scale:
A – Excellent, B – Very good, C – Good, D – Satisfactory, E – Sufficient, F – Insufficient.
Grade F also means "I do not recommend this thesis for defence."

I recommend this diploma thesis for its defence and suggest the following evaluation:
A - Excellent.
In the case of an "F – Insufficient" grade, provide comments and the shortages of the thesis and the reasons for this assessment.

The student came up with the topic of this thesis. He worked independently, almost without regular consultations with the supervisor. However, the final thesis can be qualified as excellent. The results of the final model seem to fullfil the objectives from the qualitative and quantitative point of view. Even though I suggested changing some style in the text, the student did not have time to implement that - e.g. the style I did, I used... The master's thesis is a technical report which should

not use this approach of writing. Some images or fonts in images could be smaller too. Nevertheless, I recommend the thesis for the defence with the grade A - Excellent.
